

## Visioning Session

Town & Village of Mexico

Participants: 17 + facilitator

9/18/24

6:30pm

A visioning session took place Wednesday, September 18<sup>th</sup>, 2024 in Mexico at McAuslan Hall at 6:30pm. The purpose was to use community input to develop a vision for the future of Mexico and identify up to 10 goals that relates to the accomplishment of this vision.

The community identified several areas of importance including:

- business
- housing
- recreation
- education
- culture
- tourism

During the meeting, community members were asked to participate in a VPS (Visual Preference Study), a community park design charette, and a “differences” conversation between a complete street vs its’ current state. Following the three exercises set up around the room, participants were invited to join back together as a group to create a shared vision and identify goals for the community.

As a group through this visioning session we were successfully able to come up with a draft vision statement that jointly reflects the vision of both the town and the village. We were successfully able to draft 7 goals.
